

## How to Become an ITSO Authorized Technology Partner

ITSO uses Bridge for data access. Public signup does not grant an ITSO dataset.

### Email ITSO

1. Write to [datafeeds@itsosystems.ca](mailto:datafeeds@itsosystems.ca).
2. Include company name, website, and the best email for the Bridge invite.
3. If you already have a Bridge account, say so. After ITSO adds you, you can request data for ITSO from that account.

ITSO sends the invite by hand. Wait for that email.

### Accept the invite

1. Open the invite and sign in at [www.bridgedataoutput.com](http://www.bridgedataoutput.com).
2. Review and accept the ITSO ATP Agreement. Follow it.
3. Complete your Bridge profile and keep it current.

ITSO does not provide a payload until the first member request comes in with you as the ATP.

### After a member names you

1. Open Data Access.
2. Select Request Data Access for Information Technology Systems Ontario when that step is available.
3. Open API Access, then API Access Tokens. Copy Client ID, Client Secret, Server Token, and Browser Token with Show Token. Keep tokens private.

Members add you from Bridge Agreement Management on [www.itsorealestate.ca](http://www.itsorealestate.ca). They do not use Request Data Access.

### Tips

- Keep the profile filled in. ITSO uses it when members request you.
- Never put tokens in a public site or public code.
- Help: [datafeeds@itsosystems.ca](mailto:datafeeds@itsosystems.ca).
